Maximum possible, optionally available connected load: 38 W.

According to IEC 6722-1 the given rated values of the total luminous flux and of the electric power must not deviate by more than 10 %.

The values apply to the luminaire with MFL reflector, in the case of the SSP/SP/FL/WFL/VWFL reflectors the values can deviate +/- 5 %.

The photometric values are standard values and refer to the entire luminaire. This is an example of a system design.

There are further possible ways to equip the luminaire - for these optional versions please contact info@ansorg.de.
